RED BEAR ARTIFICIAL INTELLIGENCE
EMPOWER. TRUST. VERIFY.

SALES BROCHURE

Red Bear: Venture and Growth Studio

We **build your digital product** and **bring you the customers**, as one joint venture team. Our fee comes from revenue, not your budget.

No Red Bear fees up front
You cover only hosting and ad budget

Typically 10–15% of sales
Only when you sell, and you can pass it on

Idea to sales, fast
Built and marketed in parallel

HOW IT WORKS IN 60 SECONDS

Your idea. Our team. Shared success.

Red Bear is the product, technology and marketing team you haven't hired yet. We help start-ups and growing businesses turn an idea into a digital product, app or online service, and bring in the customers who pay for it.

Tell us your idea
Product, service, app or solution

→

Prototype and plan
Screens tested, marketing plan agreed

→

Build and launch together
Product and campaigns go live at once

→

You sell, we share
Typically 10–15% of each sale

You pay

Third-party costs only, direct to the providers:

- ✓ Hosting and domains
- ✓ Ad budget
- ✓ App store fees

We cover

The expertise:

- ✓ Product and AI build
- ✓ Marketing and campaigns
- ✓ Running and improving it

We share

When your customers pay:

- ✓ Typically 10–15% of each sale
- ✓ Build it into your price
- ✓ No sale, no fee

WHAT'S IN IT FOR YOU

- ✓ **Start without capital** — no Red Bear fees before you sell
- ✓ **Keep control** — approve everything; it's all in your name
- ✓ **Move fast** — prototype in days, launch in weeks
- ✓ **Protect your margin** — pass our fee on at the point of sale

No Red Bear fees up front. Paid from results.

THE CHALLENGE

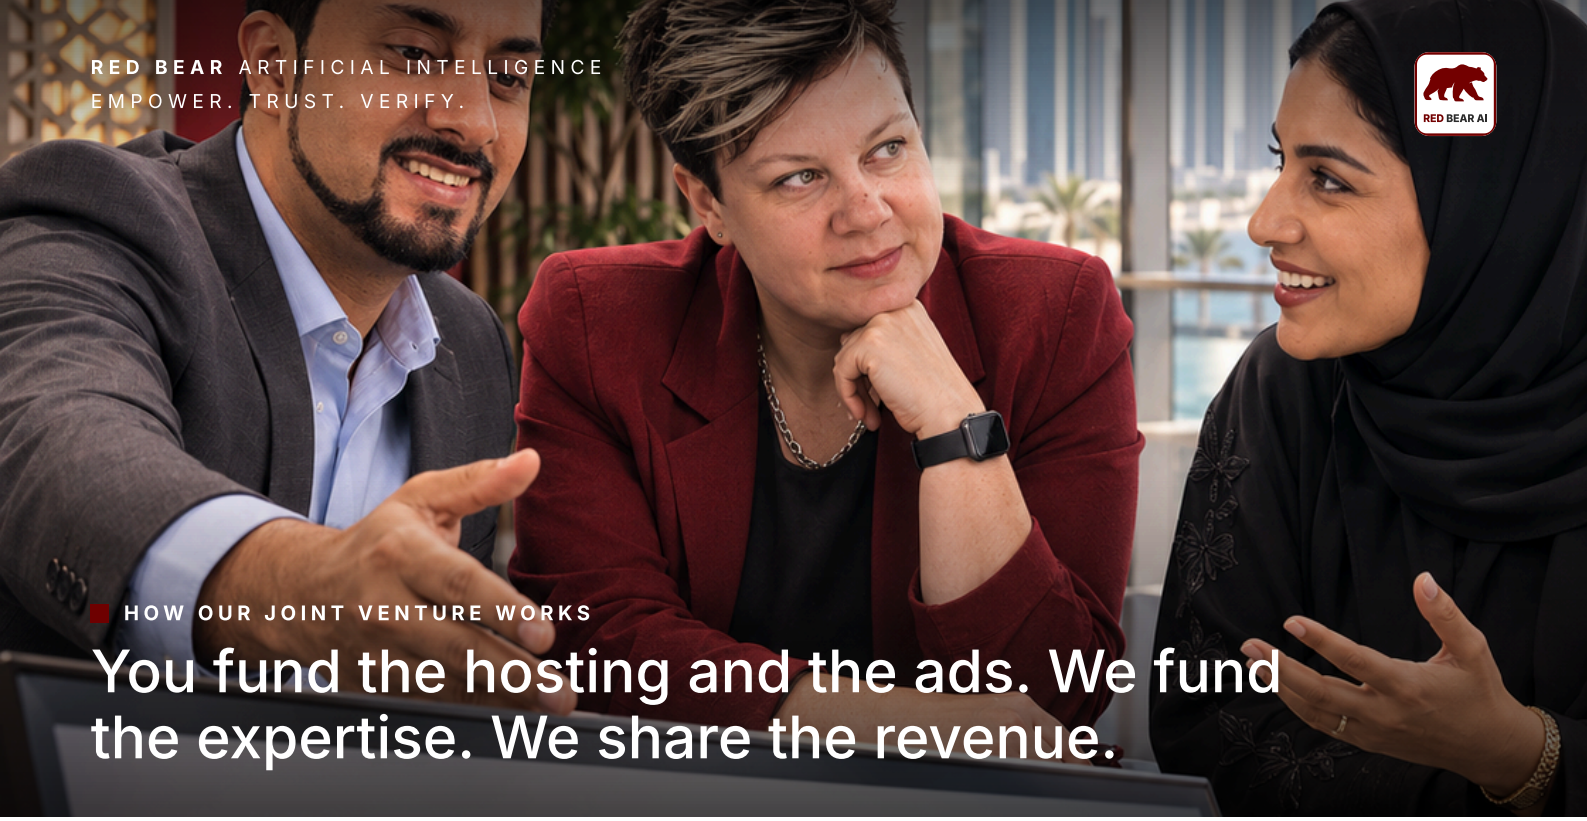
Great ideas need expert teams. Expert teams need capital most businesses don't have.

You have the idea: **a digital product, an online service, an app or a business solution**. To build it and sell it, you need designers, engineers, AI specialists, cloud infrastructure and marketers. Start-ups and scale-ups alike rarely have the capital to hire all of that expertise before the first customer pays, so good ideas stall.

THE USUAL ROUTE	**Your idea** Product, service, app or solution	→	**Raise or spend capital** Hire a team or pay agencies up front	→	**Months of cost** Build fees, salaries and retainers before any sales	→	**Runway runs out** Many stall before revenue
WITH RED BEAR	**Your idea** Product, service, app or solution	→	**We bring the experts** Product, AI, cloud and marketing	→	**Live in weeks** Prototype first, then launch fast	→	**We share revenue** Paid only when your customers pay

WHAT'S IN IT FOR YOU

- ✓ **Keep your cash** for growth, not salaries and build fees
- ✓ **Start now** not after a funding round
- ✓ **No hiring risk** no team to recruit before you have revenue
- ✓ **A partner with skin in the game** we're paid only when you sell



HOW OUR JOINT VENTURE WORKS

You fund the hosting and the ads. We fund the expertise. We share the revenue.

Our joint venture approach splits the costs the fair way. **You fund the third-party costs** that keep the lights on. **We fund the expertise**, the people and the technology. When your customers pay, **typically 10–15% of each sale** comes back to us, depending on how complex your solution is. No sale, no fee. A joint venture here means a revenue share: you keep ownership and control of your business.

You fund

Third-party costs, paid directly in your own name:

- ✓ Hosting and cloud costs
- ✓ Advertising budget
- ✓ Domain names and app store fees

We fund

The expertise you'd otherwise hire or pay for up front:

- ✓ Product design, engineering and AI
- ✓ Marketing strategy, content and campaigns
- ✓ Websites, shops and apps
- ✓ Running, support and improvement

We share

When customers buy:

- ✓ Typically 10–15% of each sale
- ✓ Lower for template solutions, higher for complex custom builds
- ✓ Agreed in writing before work starts

Customer buys
From your app, shop or site

→

You get paid
Into your own payment account

→

Our 10–15% is taken
Automatically, at the point of sale

→

You both grow
Incentives aligned on sales

WHAT'S IN IT FOR YOU

- ✓ **No capital spend** on technology, design or marketing expertise
- ✓ **You own it** accounts, hosting and customers stay in your name
- ✓ **Predictable costs** you only pay third parties, under your own control
- ✓ **Aligned incentives** we're rewarded for sales, not hours

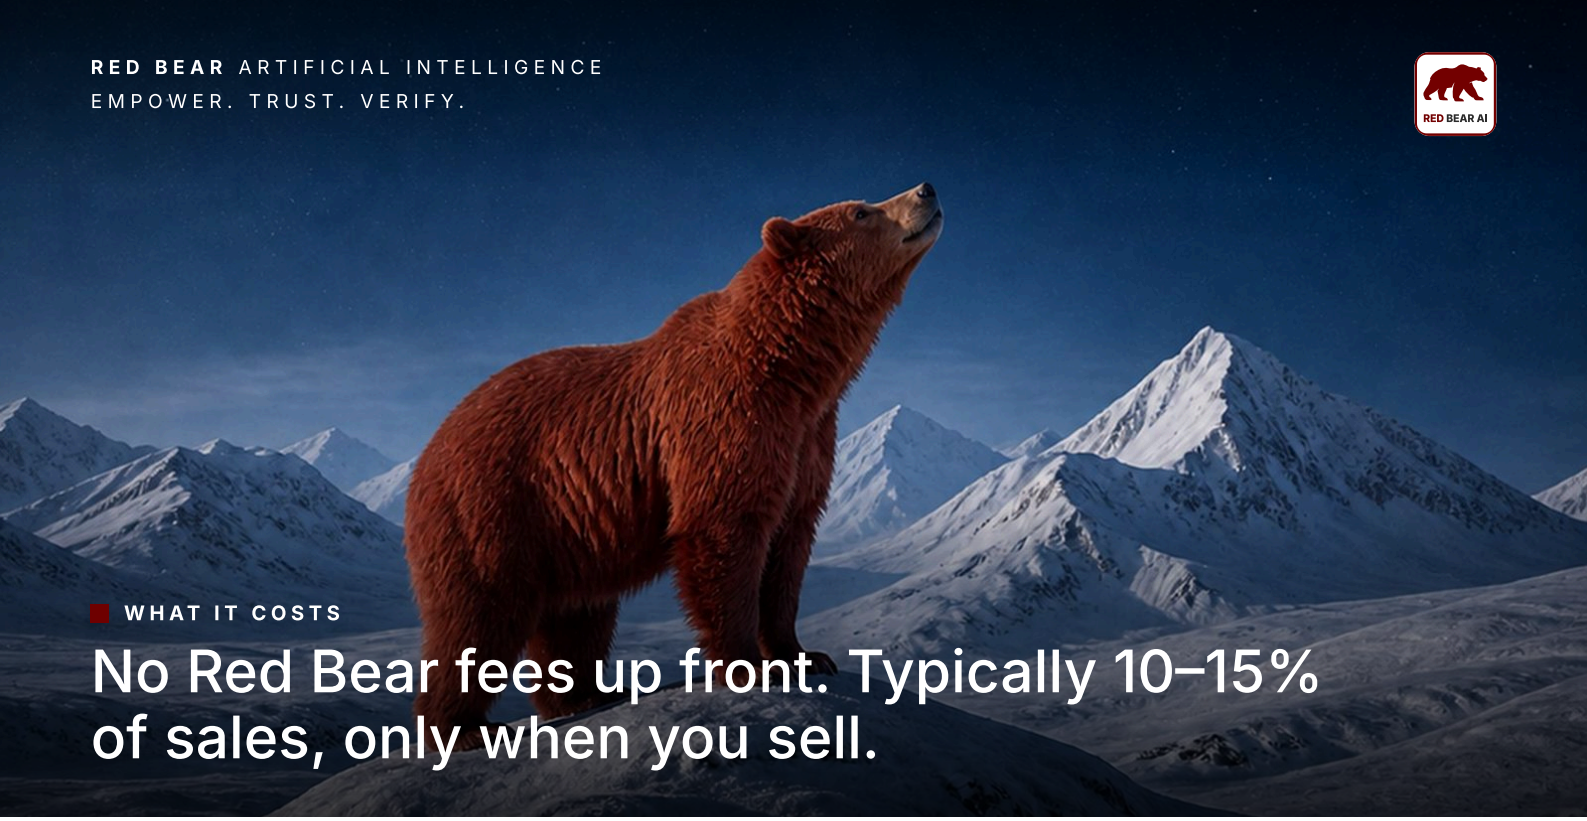
No Red Bear fees up front. Paid from results.



WHAT IT COSTS

No Red Bear fees up front. Typically 10–15% of sales, only when you sell.

There is **no invoice from Red Bear before you sell**. Here is exactly what you pay, when, and how most clients make sure our fee never comes out of their margin.

Before launch

Nothing to Red Bear. We cover design, build, set-up and strategy. You pay only small third-party costs such as domain names.

While it runs

Your running costs, hosting and ad budget, paid direct to the providers in your name. You set the limits.

When you sell

Typically 10–15% of each sale, taken automatically at the point of sale. No sale, no fee.

PASS IT ON AT THE POINT OF SALE · EXAMPLE AT 12%

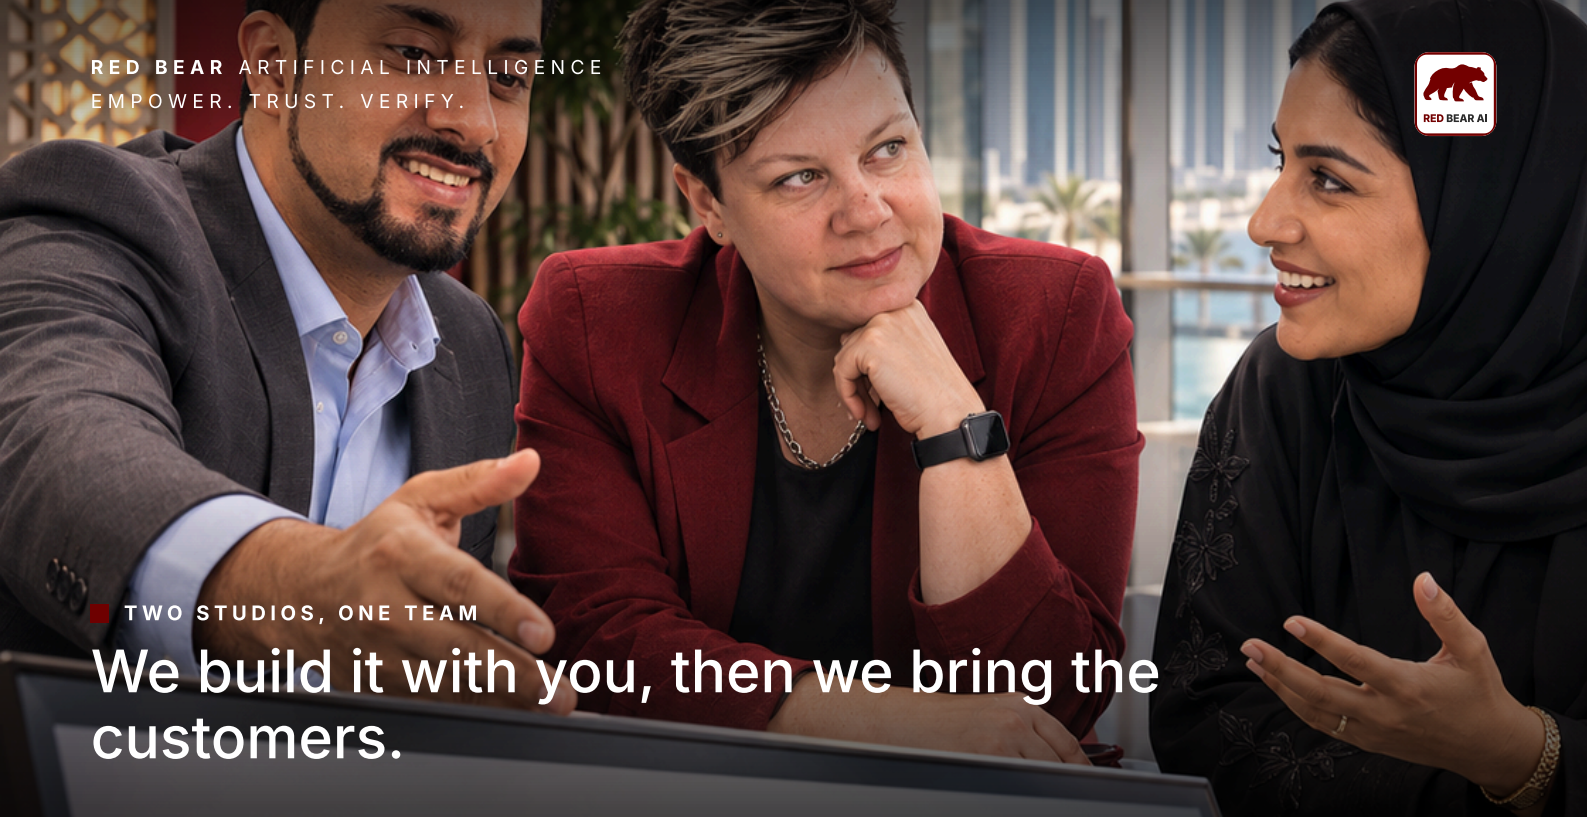
Absorb the fee	You keep AED 88	12
Build it into your price	You keep AED 100	14

Sell at AED 114 instead of AED 100 and you still keep AED 100: the fee is paid by the sale, not by you. Many businesses already price in card fees or delivery the same way.

What sets the percentage: template solutions such as shops, bookings and memberships sit around 10%; bespoke AI, integrations and complex apps towards 15%. Add some cash or equity at the start and it comes down.

WHAT'S IN IT FOR YOU

- ✓ **No up-front invoice from us** — you pay only third parties until you sell
- ✓ **A clear number** — typically 10–15%, set by complexity and agreed in writing
- ✓ **Margin protected** — build our fee into your price at the point of sale
- ✓ **No sale, no fee** — if it doesn't sell, you don't pay us



TWO STUDIOS, ONE TEAM

We build it with you, then we bring the customers.

Use either studio on its own, or both together for the whole journey from idea to paying customers, under **one joint venture agreement**.

Red Bear: Venture Studio

We design, build and run your AI product, app, automation or business application as a joint venture.

- ✓ AI products and solutions
- ✓ Mobile apps and portals
- ✓ Process automation and business apps

Red Bear: Growth Studio

We plan and run your digital marketing and e-commerce, paid from your sales.

- ✓ LinkedIn, Meta, WhatsApp, Google Ads
- ✓ Google Reviews and Trustpilot
- ✓ Websites, stores and checkout

Your idea
Product, service, app or solution

→

Venture Studio builds it
Prototype, first version, launch

→

Growth Studio sells it
Campaigns, shop, reviews

→

Revenue, shared
One agreement, one team

WHAT'S IN IT FOR YOU

- ✓ **One partner**
  from first sketch to repeat customers
- ✓ **One agreement**
  one revenue share, agreed up front
- ✓ **No hand-offs**
  the people who build it also market it
- ✓ **Faster to revenue**
  marketing planned while the product is built

THE COMBINED PROCESS

Build and go-to-market run side by side.

Because one team does both, **your marketing is planned while your product is being built**, so customers are waiting on launch day.

1	**Listen and understand**	Idea, customers, market and goals; we agree success measures and terms. ✓ Fit agreed	Days
2	**Prototype and plan**	Venture: clickable prototype tested with customers. Growth: strategy and customer journey you sign off. ✓ Plan approved	Days to weeks
3	**Build and set up**	Venture: working product with payments. Growth: shop, ad accounts, content and review requests.	Weeks
4	**Launch**	Product goes live in the app stores as approved campaigns go live. ✓ Launch day	Weeks
5	**Run with excellence**	We host, market, monitor and improve it, and share the revenue.	Ongoing

Speed to market: running build and marketing in parallel removes the usual gap between "it works" and "people are buying it".

WHAT'S IN IT FOR YOU

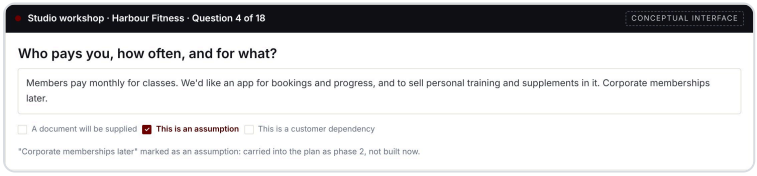
- ✓ **Customers on day one** marketing ready when the product is
- ✓ **Lower risk** demand tested before full build
- ✓ **Shorter time to revenue** no gap between build and sales
- ✓ **Continuous improvement** product and campaigns tuned together

RED BEAR: ENTERPRISE SOLUTION ARCHITECTURE

How we prototype and deliver so fast.

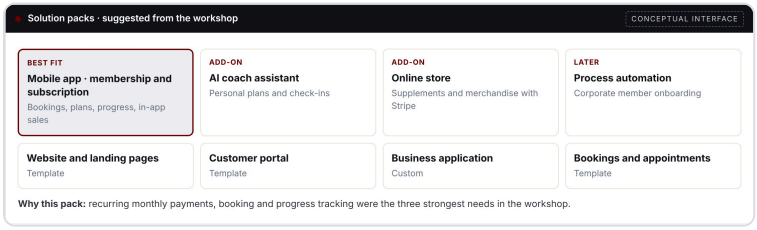
We design and prototype on **Red Bear: Enterprise Solution Architecture**, the same platform we use with large enterprises. It turns a workshop into requirements, a clickable prototype and a delivery plan, fast, with every decision traceable to what you told us.

Websites · Portals · AI solutions · E-commerce · Business apps · Process automation · Mobile apps



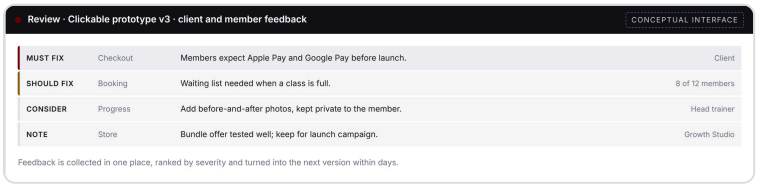
We listen in a structured way

Questions come from the right solution pack, and every answer is captured in the client's own words, with assumptions and dependencies flagged as they come up.



We start from proven building blocks

The workshop suggests the best-fit solution pack, so we start from a working design rather than a blank page.



Feedback becomes the next version in days

Client and customer feedback is ranked by severity and turned into the next prototype fast.

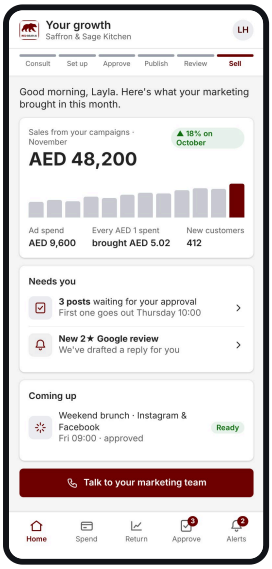
WHAT'S IN IT FOR YOU

- ✓ **Faster prototypes** from workshop to clickable screens in days
- ✓ **Fewer surprises** assumptions and dependencies tracked from day one
- ✓ **Built right first time** each step built on what you approved
- ✓ **Enterprise discipline** start-up speed with a full audit trail

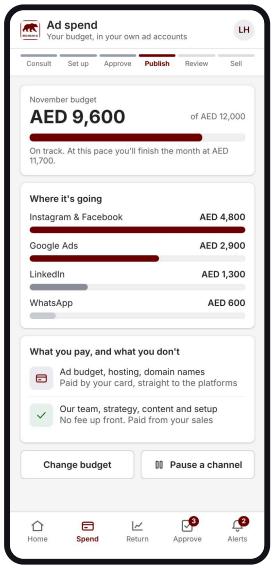
RED BEAR: SURGE ENGINE

Your growth, in your pocket. Our team, behind every campaign.

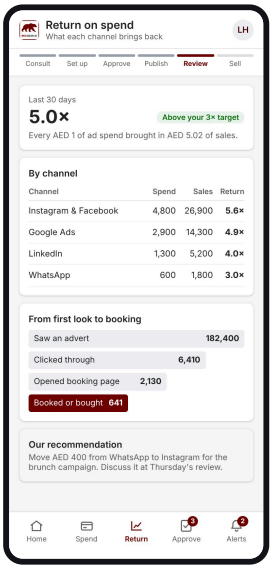
Your marketing runs on **Red Bear: Surge Engine**, our own AI platform. You get an app that shows what your marketing is earning and puts every decision in your hands, while our team runs the campaigns from the portal behind it. (Sample data from a fictional business.)



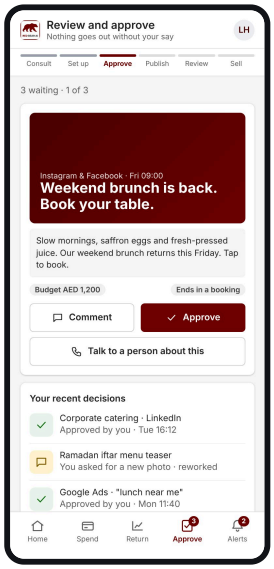
Know what your marketing earned, in ten seconds
Sales from your campaigns, what you spent and what every dirham came back as, on your phone each morning.



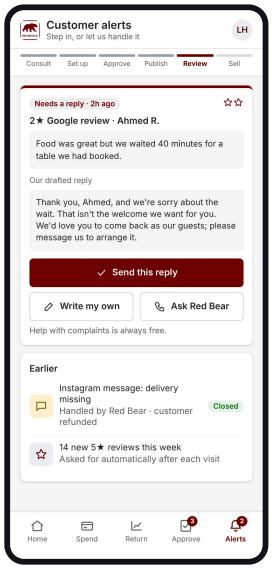
Your budget, your rules
See exactly where your ad money is going and whether you're on track for the month, channel by channel.



Put your money behind what sells
Every channel shows what it cost and the sales it brought back, from the first look at an advert to the booking or purchase.



Nothing goes out in your name without your say
Every advert and post comes to you first, with its budget, schedule and where it leads.



Protect your reputation before it costs you customers
A bad review or an unhappy message reaches you in minutes, with a considered reply already drafted.

WHAT'S IN IT FOR YOU

- ✓ **See your return** sales against spend, every morning
- ✓ **Protect your reputation** complaints flagged in minutes
- ✓ **Stay in control** approve every post and advert
- ✓ **Reach a person** one tap to your marketing team

FIVE PRINCIPLES

Big-firm wisdom. Microsoft-grade engineering. Start-up speed.

Clients get one team that combines **the wisdom of senior consultants** (EY), **the technical expertise of Microsoft, IBM and Capgemini**, and **the agility of a start-up** fuelled by talent and automation. Five principles shape everything we do.

Listen first

We start with your business, not our technology, and ask the right questions before suggesting anything.

FOR YOU

A discovery session where you do most of the talking

Understand deeply

We learn your customers, market and numbers until we can explain your business back to you.

FOR YOU

Success measures, in your terms, signed off

Prototype fast

We show rather than tell: screens and journeys you can click within days, tested on real customers.

FOR YOU

Proof before serious money is spent

Build at pace

Our engines, templates and automation do the repetitive work; our people focus on what makes you different.

FOR YOU

Weeks to launch, not months

Run with excellence

We host, secure, monitor and keep improving it, and we're paid from your sales.

FOR YOU

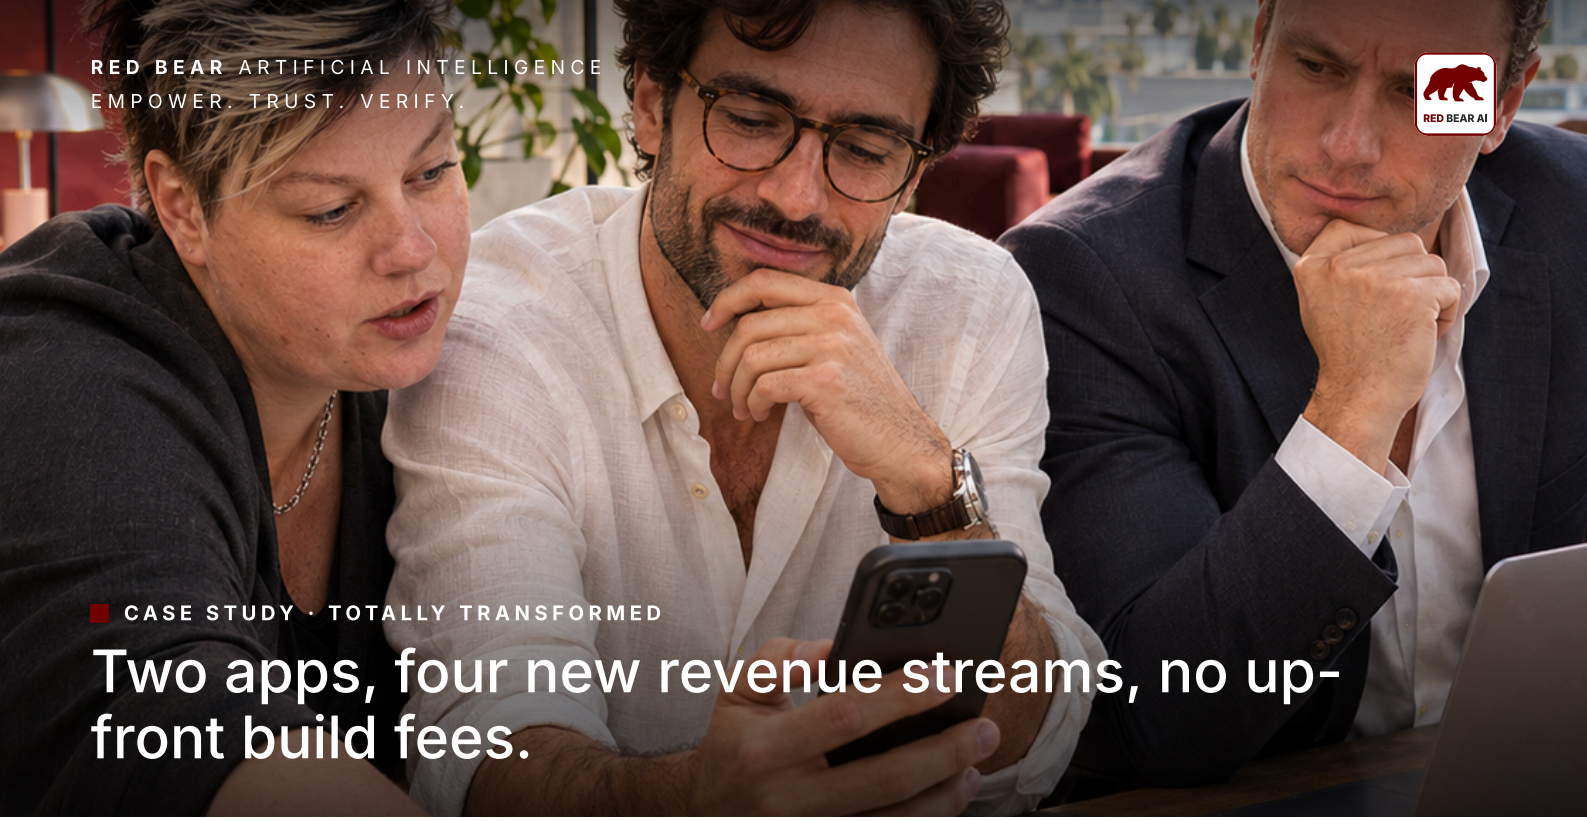
Regular reviews and a person one click away

Faster time to market
Prototype in days, launch in weeks, improve every week after.

Minimal capital spend
No build fees or new hires: you cover only hosting and ad budget.

WHAT'S IN IT FOR YOU

- ✓ **Solutions that fit** because we listen and understand first
- ✓ **Speed** our engines and automation shorten every phase
- ✓ **Less risk** ideas tested with customers before full build
- ✓ **Peace of mind** run, secured and monitored after launch



CASE STUDY · TOTALLY TRANSFORMED

Two apps, four new revenue streams, no up-front build fees.

Totally Transformed is a UK cosmetic treatment clinic. Patients found it hard to picture the value of a treatment before buying, and the clinic's income depended on the treatment room. Venture Studio built the clinic two products and Growth Studio brings them customers, with no up-front build fees.

AI treatment visualisation

A mobile app and AI that show patients a visual of their likely result during consultation, so they see the value before they buy.

A fitness and wellbeing app

A branded app that keeps patients engaged between treatments and turns the relationship into monthly revenue.

Subscriptions

Monthly app memberships

Merchandise

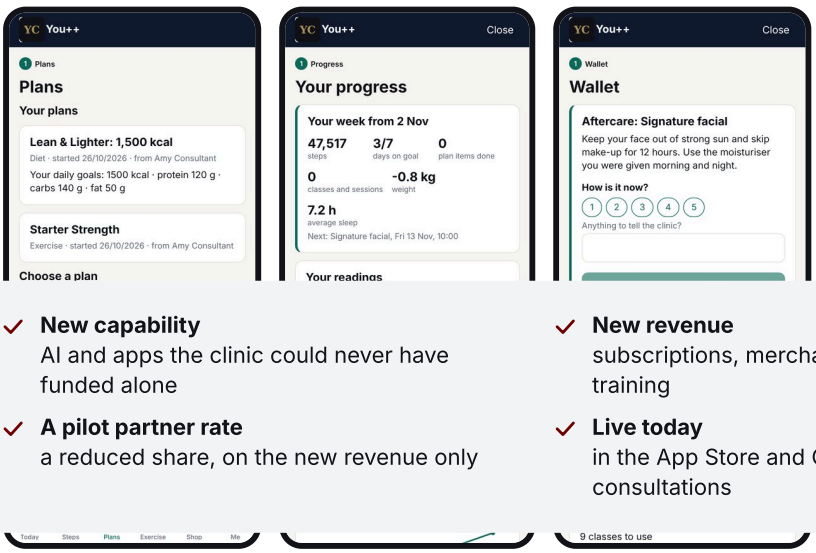
Clinic-branded, shipped direct

Supplements

Matched to each client's goals

Personal training

Partner trainers, clinic margin built in



WHAT'S IN IT FOR YOU

- **New capability** AI and apps the clinic could never have funded alone
- **A pilot partner rate** a reduced share, on the new revenue only
- **New revenue** subscriptions, merchandise, supplements and training
- **Live today** in the App Store and Google Play, used in consultations

YOUR QUESTIONS, ANSWERED

What new clients ask us before they start.

The questions new clients ask us most, answered plainly.

What does Red Bear actually do?

We design, build and run digital products, apps, online services and the marketing that sells them, for start-ups and growing businesses. Think of us as the product, technology and marketing team you haven't hired yet.

What do I pay up front?

Nothing to Red Bear. You pay third parties directly for things like hosting, domain names, app store fees and your advertising budget.

How much is your fee?

Typically 10–15% of each sale, depending on how complex your solution is. We agree the exact figure with you, in writing, before any work starts.

Can I pass your fee on to my customers?

Yes. Most clients build it into their price at the point of sale, so their own margin stays the same.

What if it doesn't sell?

Then we don't earn either. That's why we test ideas with real customers before the full build, and keep improving after launch.

Do I give up equity or control?

No. It's a revenue share, not a takeover. You can choose to offer cash or equity to lower the percentage, but you never have to.

Who owns what you build?

You do. Accounts, hosting, domains, your brand and your customers are set up in your name.

How quickly can we launch?

Prototypes in days and launches in weeks for most solutions, because we start from proven building blocks.

How long is the agreement, and can I leave?

Every agreement is written for your solution before work starts. It sets the revenue share, a minimum term that lets us recover the work we have invested, and a clear way for

WHAT'S IN IT FOR YOU

- ✓ **Plain answers** — no jargon, no small print surprises
- ✓ **A free first conversation** — tell us your idea at no cost
- ✓ **Everything in writing** — fee and terms agreed before work starts
- ✓ **No obligation** — decide once you've seen the plan

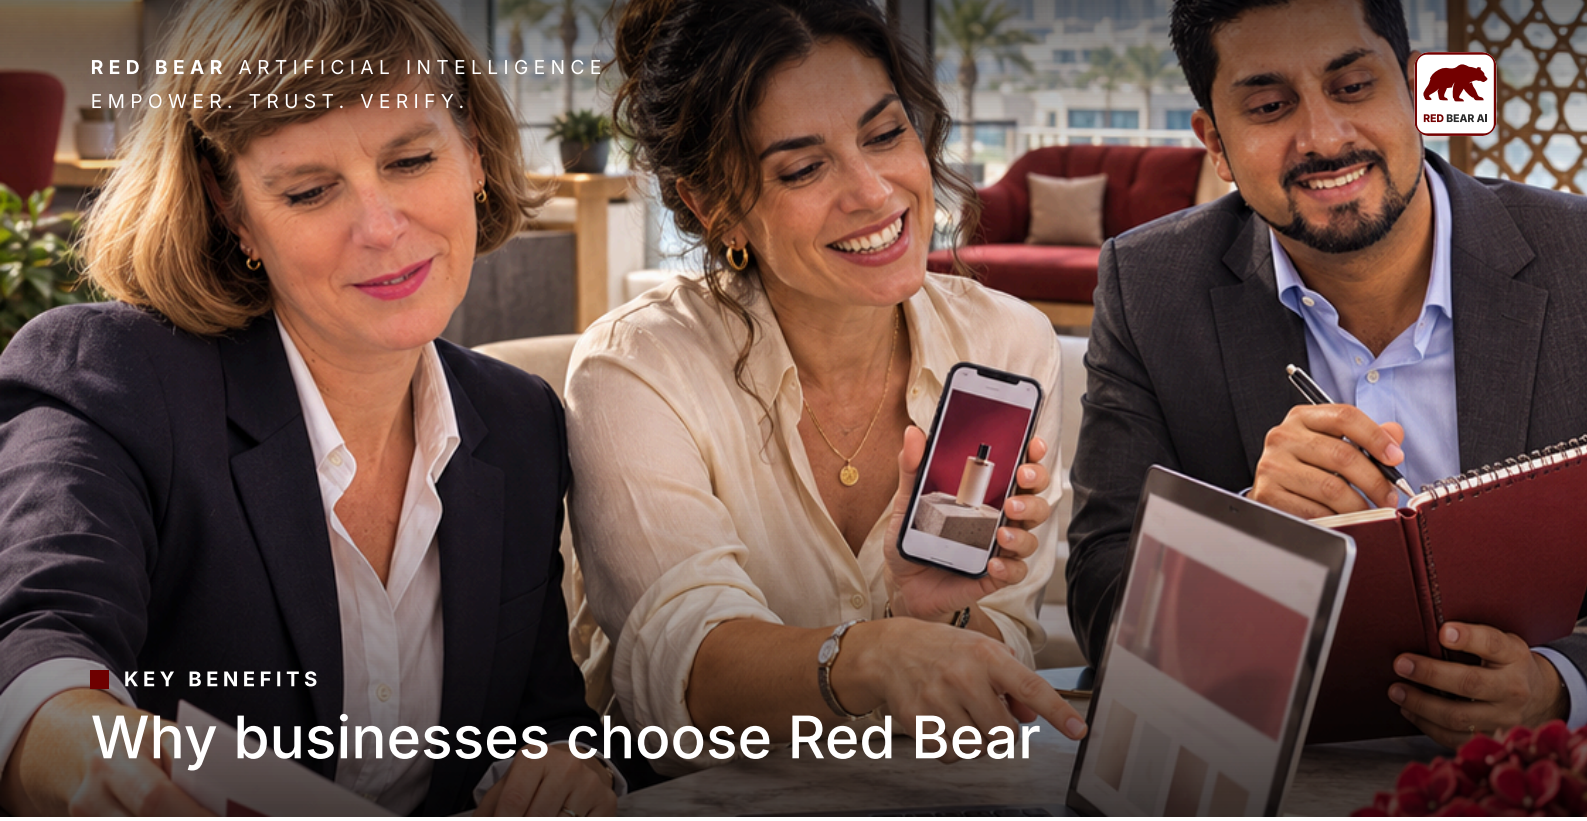
No Red Bear fees up front. Paid from results.



KEY BENEFITS

Why businesses choose Red Bear

Everything you need to take an idea to paying customers, with the people, the plan and the technology in one team, and no Red Bear fees up front. You cover only third-party costs such as hosting and advertising.

Minimal capital spend
No build fees, retainers or new hires: just hosting and ad budget.

Fastest route to revenue
Build and marketing run in parallel.

Every skill in one team
Product, engineering, AI, cloud and marketing.

Results you can see
Sales against spend, in your app, every day.

You own it
Accounts, hosting, product and customers in your name.

Shared success
We're paid only when your customers pay.

Let's talk about your idea, and your customers.

Tell us about your idea or your business. The first conversation is free and there's no obligation. We'll listen first, then come back with a plan, the fee for your solution, and the third-party costs, such as hosting and advertising, you would cover.
